# Sector Challenges & Market Drivers

- Financial, Insurance, Healthcare and Public sectors face rising regulation, cost pressure and talent shortages.
- Digital transformation remains slow due to legacy systems and fragmented initiatives.
- AI and automation create opportunities for efficiency and improved decision-making.

# Holomastrik Approach

- Finance-first methodology ensures every recommendation links to liquidity, profitability or risk.
- AI-enabled process optimisation reduces manual effort and error rates significantly.
- Pragmatic delivery: hands-on, senior-led, measurable results within weeks, not months.

# Service Portfolio

- Finance, Liquidity & Controlling: Reporting, forecasting, profitability insights and liquidity steering.
- AI & Digital Process Optimisation: Workflow automation, data quality improvement, efficiency gains.
- Growth Support & Market Guidance: Market analysis, internationalisation support, business case design.

# Typical Impact for Clients

- Financial: 10–30% liquidity improvement; 5–15% cost reduction without restructuring.
- Operational: 20–50% time savings in selected workflows; improved data reliability and reporting speed.
- Strategic: Greater resilience to regulatory and technological change; better-informed strategic decisions.
